WAEL OUNI

SENIOR FULLSTACK JAVA / ANGULAR DEVELOPER | SPRING BOOT | CI/CD

Lille metropolitan area, France • Open to hybrid assignments in Belgium • French: fluent | English: professional

PROFESSIONAL SUMMARY

Software engineer with 10 years of experience building and maintaining Java/Spring and frontend applications, including Angular-based products, across retail, insurance and financial services. Hands-on expertise in Java 8–21, Spring Boot, REST APIs, SQL databases, automated testing and CI/CD. Experienced in technical design, modernization of legacy applications, pull-request reviews, deployments, incident resolution and collaboration with analysts, QA engineers and product teams in Agile environments.

TECHNICAL SKILLS

Backend: Java 8 / 11 / 17 / 21, JEE, Spring Boot, Spring MVC, Spring Batch, Spring Reactive, REST / SOAP APIs, Hibernate, Maven, JUnit

Frontend: Angular 6 / 7 / 11 / 12, TypeScript, JavaScript, Vue.js, HTML, CSS, Playwright, Jest

Databases & integration: MySQL, PostgreSQL, Oracle, SQL Server, MongoDB, Kafka, Kafka Connect / Streams, Avro

CI/CD & operations: Git, GitLab CI/CD, GitHub Actions, Jenkins, Docker, Kubernetes / GKE, GCP, Azure, Vault, Datadog, Kibana

Ways of working: Agile / Scrum / Kanban / SAFe, solution design, code reviews, unit and integration testing, refactoring, production support

PROFESSIONAL EXPERIENCE

ADEO — Senior Java / Vue.js Fullstack Developer | *Apr 2023 – Present*

Order management, warehouse and transport applications (KALYPSO / KADI, WADI-ACL, WIMO).

- Develop and maintain Java 17/21 and Spring Boot services, REST APIs and batch processing for orders, shipments and logistics workflows.
- Design and enhance Kafka / Avro integrations; work with MongoDB and Oracle, asynchronous event processing and error-handling / DLQ scenarios.
- Contribute to Vue.js interfaces and backend APIs; build automated tests, review merge requests and address code quality and dependency-security issues.
- Improve GitLab CI / GitHub Actions pipelines and support QA, staging and production deployments on GCP / Kubernetes.
- Diagnose production incidents and implement Datadog monitoring to improve service reliability.

Environment: Java 17/21, Spring Boot, REST/SOAP, Kafka, Avro, MongoDB, Oracle, Vue.js, GitLab CI, GCP, Kubernetes, Datadog, Playwright

AG2R LA MONDIALE — Java / Angular Developer | *May 2022 – Mar 2023*

Supplementary pension digital journeys.

- Migrated a legacy GWT application to Angular 12 and Spring Boot.
- Developed calculation simulators, business workflows and an internal customer / access-management console.
- Handled defects and acceptance-test feedback while supporting team delivery.

Environment: Java 8/11, Spring Boot, Angular 12, SQL, Git, Kibana

ADEO — Java / Angular Developer | *Jan 2021 – Apr 2022*

Customer master data and online payment services for Bricoman and Leroy Merlin.

- Developed Java / Spring components for payment workflows and contributed to Angular 11 interfaces.
- Supported customer-data migration (Sirius to MDM), asynchronous Kafka jobs and application operations.
- Worked with GitLab CI and GCP/GKE; monitored incidents through Datadog and K9s.

Environment: Java 11, Spring, Angular 11, Kafka, GCP, GKE, GitLab CI, Vault, Datadog

EARLIER EXPERIENCE

AXA FRANCE — Java Developer / Analyst | *Jul 2019 – Oct 2020*

Several engagements: OSMOSE modernization, individual health insurance and TECOS data quality.

- Modernized contract-management applications and delivered Java / Spring REST services and batch-oriented data processing.
- Implemented CSV data normalization, Excel report generation with Apache POI, and REST/SOAP integrations.
- Contributed to CI/CD, application monitoring, functional testing and production releases.

Environment: Java 8/11, Spring, Spring Batch, SQL Server, Azure DevOps, Jenkins, REST/SOAP, Kibana

LEROY MERLIN / ENKI — Java / Angular Engineer | *Aug 2018 – Jun 2019*

Works With ENKI partner portal.

- Built Angular 7 interfaces, role-based access controls and partner registration workflows.
- Developed Spring Boot services and REST integrations with Drupal; configured Keycloak and Docker environments.

Environment: Java 11, Spring Boot, Angular 7, MySQL, MongoDB, Docker, GitLab CI, Keycloak

DECATHLON — Java / Angular Developer | *Apr 2018 – Aug 2018*

MyQualityGate proof of concept.

- Delivered Angular dashboards, data visualization components and Spring Boot CRUD APIs.
- Contributed to technical specifications and Maven / Jenkins-based continuous integration.

Environment: Angular 6, Spring Boot, Maven, Jenkins, Docker / Rancher, PostgreSQL

INNOV ATM — Java Engineer | *Jan 2018 – Apr 2018*

Air traffic simulation and visualization.

- Contributed to a JavaFX application with live map visualization, video components and technical documentation.

Environment: Java, JavaFX, XML, Maven, SVN

SQUEEZER SOFTWARE — Java / Android Engineer | *Aug 2016 – Jan 2018*

Mobile application development.

- Designed and developed Android applications for streaming / VOD, task management and retail.

Environment: Java, Android, XML, Gradle, JSON

PERSONAL TECHNICAL PROJECT

StockPilot AI | 2026

Experimental conversational assistant for retail catalogue discovery, stock lookup and order preparation. Developed a modular FastAPI backend with MongoDB, local Ollama LLM integration, REST APIs, intent classification, automated tests and GitHub CI. Personal prototype, separate from client assignments.

EDUCATION

2016 • Engineering degree in Software Engineering

2013 • Bachelor's degree in Computer Science

LANGUAGES

French — Fluent | English — Professional working proficiency

ADDITIONAL INFORMATION

Based in Lille, France • Freelance contractor • Notice period: 4 weeks • Available for regular travel to Belgium
